GPS Safety camera warnings
& Mio's patented Smart Alert

Super-Cap: Super capacitor
for extreme conditions

Record at all times
with Parking Mode

Designed for highly enhanced video brightness – Sony’s premium STARVIS™ sensor with F1.8 large aperture

For detail-packed videos with superb contrast, clear and rich colours, especially in low-light conditions.

Sharper images with High Dynamic Range (HDR) recording

- By adopting the HDR function, MiVue™ C595W automatically captures multiple frames with different exposure values, then combines these frames to create a single image which is optimized to a brighter and sharper one with less noise.

60fps High Speed Recording

- When compared with conventional 30fps, this double data density allows for exceptionally detailed and smooth video even when recorded at high speeds.

60fps vs 30fps

Integrated Wi-Fi

- The integrated Wi-Fi will synch your footage in real-time to your smartphone. The firmware and safety camera data are easily updated via OTA (Over-the-air), ensuring your device is always up-to-date.

| VIDEO | | HARDWARE | | SOFTWARE | |
|----------------------|-----------------------------------|-------------------|-----------------------------------------------------------|----------------------------|------------------|
