MiVue™ C380 DUAL

YOUR EYEWITNESS ON THE ROAD

Disputed liability is every driver's worst nightmare. Recording your journey ensures that when you're in an accident that isn't your fault, you are protected. The MiVue™ C380 Dual dash cam with Sony's optic sensors for both front and rear cam provides you with peace of mind: if and when you need evidence, you already have it.

Superb picture quality – for accurate footage

The MiVue™ C380 Dual uses a Sony's optic sensor and 130° wide-angle lens to record footage in crystal clear 1080p full HD at 30fps. You'll capture registration plates*, road signs, and markings to use as evidence supporting your version of events. It records clearly in low-light conditions too.

Simple to use – to save you time

Designed for simplicity, the MiVue™ C380 Dual can be easily set-up: simply insert the SD card, connect to your car's power source and the dash cam will begin recording as soon as you start your vehicle's engine. The device's menu is intuitive with large icons, so you and your dash cam can be ready to go within minutes.

Safety features – for fear-free driving

The MiVue™ C380 Dual also comes with safety camera alerts that update for the lifetime of the device. You can also add new safety camera spots that may not have been added to the data base as yet. Your MiVue™ C380 Dual ensures you're always alert and under the limit.

The G-sensor detects sudden changes in motion and collision, automatically triggering emergency event recording that can't be overwritten.

GPS built-in – to record location and speed

The MiVue™ C380 gives you the option to log GPS location and your speed on every recording: this way you know that vital information is stored for when you need it. The GPS module is housed inside the unit, so unlike most other dash cams on the market, there are no external devices that need to be connected. GPS also includes speed alert and speed cam locations to help keep you under the limit.

The complete package – MiVue™ A30 rear cam included

Your MiVue™ C380 Dual device comes with the MiVue™ A30 rear camera to compliment your dash cam, capturing details behind your vehicle and alleviating your blind spot.

The MiVue™ A30 uses a Sony's optic sensor and 140° wide-angle lens to record footage in crystal clear 1080p full HD at 30fps.
